

welcome to an

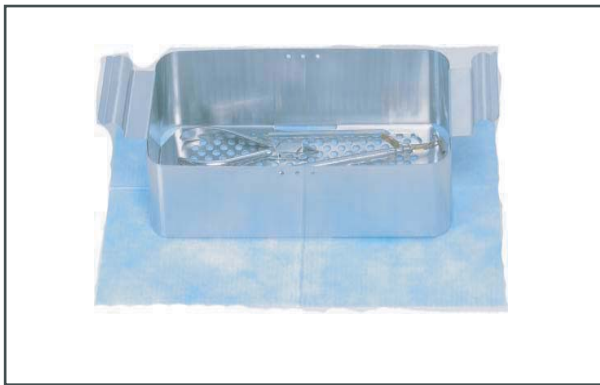

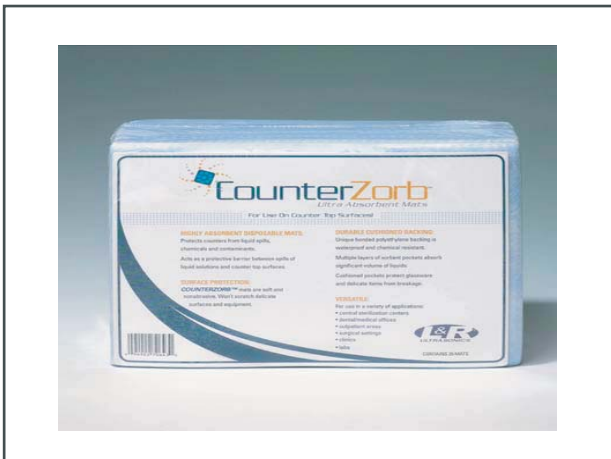

L&R CLEAN world

For use on Counter Top Surfaces

New CounterZorb™ Ultra Absorbent Mats have been designed with a superior multi-layer technology to protect surfaces and counter tops from liquid spills, chemicals and contaminants. Each mat has a unique 6 ply construction including the polyethylene laminate backing which is water and chemical resistant. The cushioned surface pockets protect glassware and delicate items from breakage. The mats are soft, non-abrasive and won't scratch delicate surfaces or equipment.

CounterZorb Mats are easy to use. Simply position a mat near your Ultrasonic Cleaner, Autoclave or sink area and place your ultrasonic accessory basket or other wet instruments on the mat. CounterZorb's unique design disperses the liquid throughout the mat, enhancing absorption. CounterZorb keeps the surface drier while acting as an infection control barrier against cross contamination.

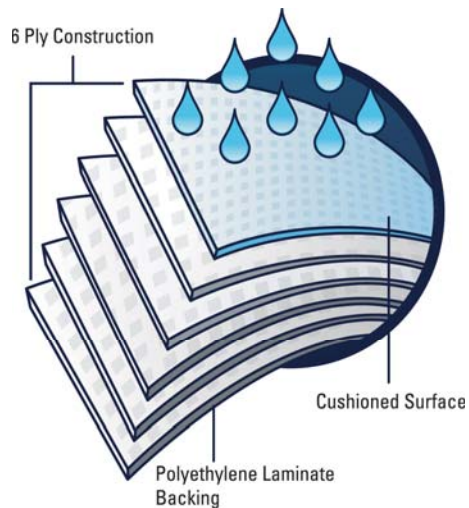

Reorder # 01399

Versatile:

For use in a variety of applications:

- Central Sterilization Centers
- Dental/Medical Offices
- Outpatient Areas
- Surgical Settings
- Clinics
- Labs
