For optimal instrument processing during the infection control cycle, it’s critical that every instrument be ultrasonically cleaned for the same amount of time—every time.

To eliminate the addition and removal of contaminated instruments during an ultrasonic cleaning procedure, the EFFICA Ultrasonic Cleaning System features an optional automatic locking lid. This unique attribute secures the lid throughout each cleaning cycle to provide a standardized, efficient instrument processing program, ensuring clean confidence and repeatable results with every operation.

- Key component of instrument decontamination and reprocessing
- Contemporary design
- Quiet operation
- Fast, convenient draining
- Unique locking lid option
- Digital touchpad timer
- Multifunctional cover
- Basket included
- Uniform cleaning power
- Two-year warranty

because clean matters.
**Unique Locking Lid (Optional)**

- Automatic locking lid and push button timer ensure a monitored, measurable, and uniform cleaning cycle.
- Automatically locks when cleaning cycle begins and unlocks when cycle is complete.
